

The St Helens Neurodevelopmental Pathway

What is the neurodevelopmental pathway?

The Neurodevelopmental pathway team work with children and young people with complex neurodevelopmental difficulties, who require a multi-agency assessment to gain a better understanding of their needs. The assessments are carried out by professionals from;

- **St Helens Local Authority** e.g Educational Psychologists, Language and Social Communication Team Teachers
- **Bridgewater Community Healthcare NHS Foundation Trust** e.g Community Paediatricians, Speech and Language Therapists
- **North West Boroughs NHS Foundation Trust** e.g Consultant Psychiatrist, Occupational Therapists and others.

These results of coordinated assessments are considered by a multi-agency panel. This may result in a diagnosis of Autism Spectrum Disorder (ASD), Attention Deficit and Hyperactivity Disorder (ADHD), General Developmental Delay (GDD) or difficulties with Attachment.

Who are we

Lynsey Boggan—Neurodevelopmental Pathway Lead

Stephanie Shard—Neurodevelopmental Pathway Coordinator

Diana Cunliffe—Neurodevelopmental Pathway Administrator
