

Year 2

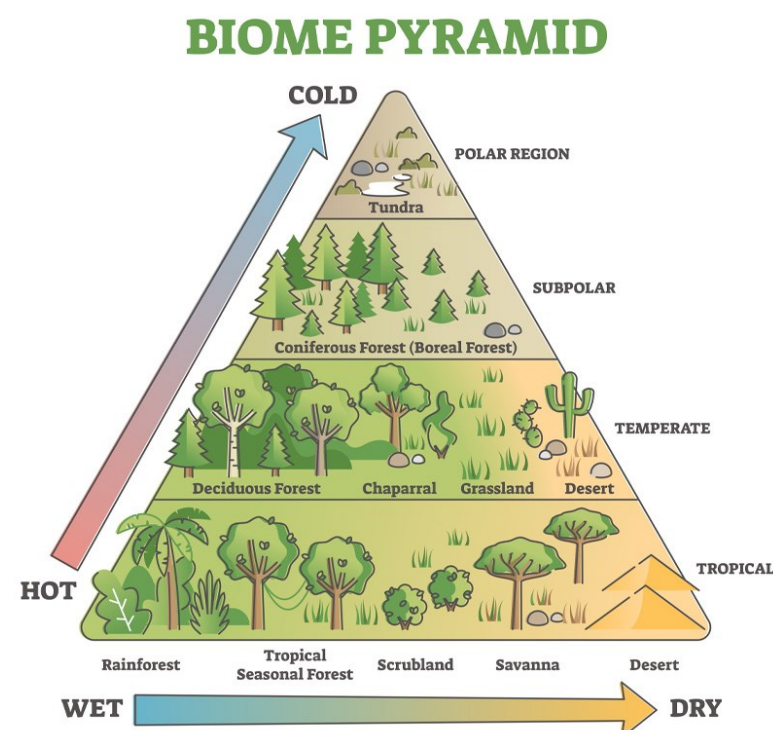

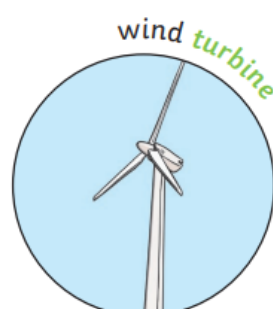

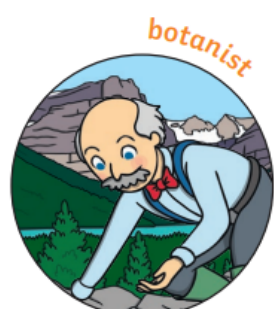

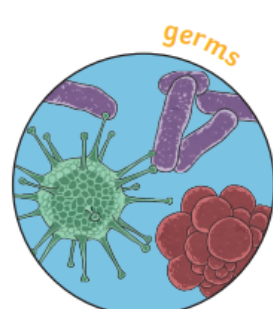

FAMOUS
SCIENTISTS
and
INVENTORS

Key Vocabulary			

Key Subject Vocabulary

Biome	A biome is an area with similar weather, rainfall, temperature, plants and animals.
Eden Project	The Eden Project has specially built 'biome' structures. These house lots of different plants.
Botanist	Botanists study plants
Doctor	Doctors treat people who are ill. They use science to work out what is wrong with someone and how to treat it.
Germ	Germ is a tiny living thing that can cause diseases.
Turbine	A turbine turns wind into electricity.
Waterproof	If a fabric is waterproof, water can not soak through it.

Tim Smit had the idea to build the Eden Project.

Jane Colden was a botanist. She is thought to be America's first woman botanist.

Louis Pasteur discovered that germs are living things that can be spread by touch or through the air.

A scientist who studied ocean habitats. She discovered that pollution from farms was affecting the oceans and the animals in them.

Nicholas Grimshaw designed the biomes for the Eden Project.

Elizabeth was the first woman to qualify as a doctor. She qualified in 1865.

Charles Macintosh invented the first ever waterproof fabric.

Invented the wind turbine in 1887. He used it to power the lights in his holiday home.
